Internet of Things course

For each project phase and on the day of the demonstration, students should clearly describe each group member's role and specify the tasks or activities each member performed.

This file should be sent along with the project code and should also be opened and accessible during the demonstration time.

Group name: Smart Things **Section name: 3** **Phase: 2**

Student name	Tasks and duties
#1 Kiara Bartuccio	Worked on coding, front-end. Like, index.html, script.js, style.css
#2 James Luciano	Developed email and notification logic, connect front end with backend
#3 Sean Lussier	Worked on motor logic, making the circuit with motor, fan speed control
#4 Mohamed Amine Hamidouch	Worked Arduino script and building the circuit with the 2 ESP32
